

Prescription Task

Cute Level

For Cute People

- make a page that view the prescriptions list with add button
- button can view another page for adding or modal, (you get to choose)
- the adding form will include (name, age and the drugs)
- you can write the name of the drug and press “add drug”
- you don’t have to implement a search or drop list
- you don’t have to implement the pdf thing
- you can save the prescription into local storage or firebase as you like

Intermediate level

For Intermediate

- the same cute task but you have to implement the auto complete search
- saving the prescription into the firebase

Monster Level

For Monster

- same as intermediate level but you add the print PDF for every prescription
